

# KLEEN & FRUESH™

## Air Conditioner Cooling Coil Cleaning and Disinfection

Regular cleaning of your vehicle's air conditioner unit is just as important as cleaning your house's air conditioner unit. Just imagine the number of hours we travel on the road with our family and the air we breathe in every time we step into our ride.

How wonderful would that be if we could have our vehicle's air conditioner unit cleaned regularly – removing trapped particles like dirt, dust, carbon and even killing bacterial and fungi that resides on it?

And we are talking about cleaning one of the most important part of an air conditioner unit – the cooling coil / evaporator; using a formula that is made of natural vegetable extracts – which is non-toxic, biodegradable and safe for health.

**CLASANI Kleen & Fruesh** – Disinfects, deodorizes and decarbonizes your vehicle's air conditioner cooling coil in a safe and healthy way.

### Benefits

- **Removes trapped particles like dirt, dust, grease, carbon, bacteria and fungi etc from the cooling coil**  
Increases efficiency of the air conditioner and reduces allergies
- **Made of natural vegetable extracts – non-toxic and biodegradable**  
Safe for health and gentle / zero damage to the cooling coil and internal parts
- **Powerful germicidal and fungicidal properties**  
Kills bacteria\* and fungi^
- **Odour elimination**  
Eliminates odour caused by trapped particles on the cooling coil
- **Formulated with anti-corrosion agent**  
Inhibits corrosion of the cooling coil and other internal parts
- **Conforms to Douglas CSD #3**  
Tested and found to be over 90% effective in eliminating various bacteria\* and fungi^
